Winworks Software, Inc. Announces Version 7.23

Placerville, California: Winworks Software has just released the Version 7.23 interim software update for your Winworks AutoShop management system.

Note: Some of these new features may not be available to you if your technical support has expired.

1. A new December 2015 Vehicles Database is included with this update
2. CARFAX users now have the convenience of automatic upload after End of Day processing. See the Data tab on the Preferences window.
3. Standard tasks are no longer limited to 9,800.
4. We've corrected PDF viewing issues with Windows 10.
5. We have dramatically increased the speed of the Parts History Report on the Customer window.
6. For work orders written on mobile devices, we now default to taxable if parts are normally taxable.
7. We have made improvements to the IAP (Internet Auto Parts) integration.
8. We corrected an emailing issue when using the Bypass email configuration.
9. When adding multiple parts to a work order, the vendor will now default to the previous vendor unless you enter a part from the database.
